SEP490 Â· CAPSTONE PROJECT Â· REVIEW 2 Â· BM02

SRS/SDD Self-Review Report â€“ Review 2

Form BM02. Run the standard prompt on the proposed final registration form and the repository at tag review-2. Keep every finding exactly as produced by the AI; add only the Team response column. Export to PDF. File name: SEP490_<ProjectCode>_R2_SelfReview.pdf

1. Run Information

Project code	FA26SE249
Project name	PrintGrid: Development of a Distributed 3D Printing Fulfillment and Scheduling Platform for a Network of Independent Printing Labs
Team	Nguyen Xuan Tan (SE181599, Leader) Ã‚Â· Dau Nguyen Bao Tuan (SE185029) Ã‚Â· Nguyen Quang Minh (SE181684) Ã‚Â· Truong Quang Nhat (SE181682)
Supervisor	Nguyen Tan Phuc (phucnt40@fpt.edu.vn)
AI tool and model	Claude Code CLI (Anthropic) Ã¢â‚¬â€ ds/deepseek-flash
Run date	02/11/2026
Repository tag / commit	review-2 Ã‚Â· commit ed231b7 (tag to be pushed)
Registration form version used	v1.2 FULL (proposed final) + FR-CUST-014..016 proposal (07b, 06/10/2026)
Version	1.0
Date	02/11/2026

2. Standard Prompt

Use this prompt without modification.

```
You are reviewing the SRS and SDD of a software capstone project against its
registration form and source code. Report only; do not change any file.

Inputs: the registration form, SRS, SDD (with diagrams), source code and
database script in this repository.

Check:
1. Scope: FRs in the SRS not covered by the registration form, and
   registration items with no FR.
2. Requirements: FRs without an actor or testable acceptance criteria;
   NFRs without metric, threshold and measurement method.
3. Data: entities missing from the Logical ERD; ERD entities or attributes
   missing from the database script, and tables not in the ERD.
4. States: for each main entity, states used in code but missing from its
   state machine; transitions with no triggering FR; states with no exit.
5. Flows: main business flows in activity diagrams with no implementation
   or no test.
6. Architecture: components or third-party services in code but not in the
   architecture diagram, and the reverse.
7. Design vs code: modules, APIs or business rules implemented differently
   from the SDD.

Output one table: ID | Category | Location | Finding | Severity
(High/Medium/Low) | Evidence. Then list the 5 most important findings.
If something cannot be verified from the repository, say so; do not guess.
```

3. Findings and Team Response

Team response: Fixed (link to commit) Â· Kept (reason) Â· Planned (owner and due date). Do not delete any finding.

ID	Category	Location	Finding	Severity	Evidence
SR-01	*Scope*	*SRS FR matrix Ã‚Â§0; registration v1.2 Ã‚Â§3.2c; frontend routes*	*Public sample library, pricing page and network page are implemented, but FR-CUST-014..016 are still marked Proposed in 07b and are absent from the approved SRS matrix and the registration form.*	*High*	*07b_De-xuat-FR-Customer-Portal.md Ã‚Â§3; src/PrintGrid.Api/Controllers/SamplesContro frontend PublicNavbar.tsx:16-17; routes /sar /pricing, /network*
SR-02	Data	Report 3 Ã‚Â§Entities; Report 4 Ã‚Â§2.3	SampleModel is a persisted entity (admin.sample_models) used by admin and public APIs, but it is missing from the 28-entity Logical ERD and from the table descriptions.	High	printgrid-schema.sql: CREATE TABLE admin.sample_models; SampleModel.cs Report3_ERD.md entity table rows 1-28
SR-03	Requirements / Design vs code	FR-CUST-012; OrderPaymentsController	FR-CUST-012 requires gateway webhooks and idempotent transaction ids for deposit and balance; the code exposes only an Ops mark-paid action, with no gateway call, transaction id or idempotency key.	High	OrderPaymentsController.cs:44-51; MarkOrderPaidCommand; audit BR-PAY-005/006
SR-04	Requirements / Design vs code	FR-LAB-004; BR-ASSIGN-010; assignment flow	Registration and BR-ASSIGN-010 require offer fan-out to the top-k labs and first valid accept; the implementation assigns one lab directly and only that lab can accept or decline.	High	IAssignmentEngine.cs; no Offer aggregat printgrid-schema.sql; JobsController.cs accept/decline endpoints
SR-05	States	Print-Job-State-Machine.drawio; JobStatus.cs	The state machine has ReadyForShipment and a separate AwaitingInspection (Received at Hub) state that are absent from JobStatus; JobStatus.Cancelled has no state or transition in the diagram.	Medium	JobStatus.cs:3-14; Print-Job-State-Machine.drawio node and edge labels
SR-06	Requirements	FR-CUST-006; QuoteItem	FR-CUST-006 and BR-LOG-004 require a shipping line with a bounded loss in the quote breakdown;	High	QuoteItem.cs fields; audit BR-LOG-004

ID	Category	Location	Finding	Severity	Evidence
			QuoteItem stores only material and machine-time cost, so delivery is not quoted.		
SR-07	Architecture / Security	NFR-SEC-007; BR-ACCESS-001; JobsController	NFR-SEC-007 requires access through short-lived links; GET /jobs/{id}/file streams the object from the API with a controller-side check and no expiring pre-signed URL.	High	JobsController.cs:116-175; GetPresignedUrlAsync is used only for Q photos at JobsController.cs:314
SR-08	Requirements	NFR-SEC-008	NFR-SEC-008 has no measurable threshold or method (Metric: session security configuration) and the code uses 1-hour access and 7-day refresh tokens, not the stated 30-minute inactivity timeout.	Medium	10-Non-Functional-Requirements.md NF 008; appsettings.json Jwt section
SR-15	Requirements	SRS FR matrix Ã‚Â§0; registration v1.2 Ã‚Â§3.2c	FR-CUST-012 and FR-CUST-013 are still marked Proposed (R1) in the SRS matrix although the registration presents staged payment and design intake as committed; approval status is inconsistent.	Medium	09-Functional-Requirements.md rows FR 012/013; registration v1.2 Ã‚Â§3.2c

4. Top 5 Findings (as reported by the AI)

#	Finding ID	Summary
1	SR-01	Public sample, pricing and network pages exist without an approved FR or registration item.
2	SR-03	Deposit and balance are an Ops mark-paid bridge; no gateway, transaction id or idempotency.
3	SR-04	Direct assignment remains; offer fan-out and first-accept are not implemented.
4	SR-07	Job files are streamed without an expiring pre-signed URL, so the IP window is controller-only.
5	SR-06	Shipping is not a quote line, so the committed price excludes delivery.

5. Summary

Severity	Total	Fixed	Kept	Planned
High	6	0	0	6
Medium	8	0	0	8
Low	1	0	1	0

Every High finding marked Kept or Planned must also appear in section 5 (Known Gaps) of the Design Brief.
